WARNINGS

- This product must be installed in accordance with all applicable codes by a person familiar with the product.
- Each fixture must be **properly supported** during install.
- **DO NOT** join fixtures on the floor prior to lifting, or damage will occur.

SES-Pendant-Continuous-Run Installation Instructions

• **Before beginning installation**, review our complete list of warnings by visiting www.saylite.com/warnings.

Step 1 - Mounting and Suspension

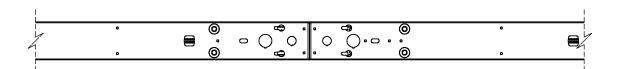

Mounting

Drywall or other hard surfaces - HC 301 Hanging Kit*

- Install hanging kits at suspension locations.
- Ensure hanging kits are secure.
- Prepare fixture for mounting.

Other hard surfaces include: wood, sheet metal panels, steel beams, concrete or masonry. Use hardware appropriate for each surface and material type.

Suspension Locations

X = Suspension Dimensions

Refer to Assembly Drawings and building plans to determine exact mounting, suspension points, and power feed locations.

Step 2 - Identification and Preparation

A. Identify Fixtures

SayliteLED Texas Fluorescents Reinvented

PART# SES24PSFxxFxxWxxxxLDMV-B/-J/-E

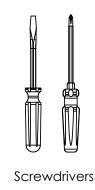

VOLTAGE: 120-277, 50/60HZ

WATTAGE: XX MAX FLUX: XXXX LUMENS

CCT: XXXX
DATE CODE: XX/XX/XX

TYPE: XX

B. Tools Needed

Safety Glasses

- Use labels found on the box and inside the fixture bodies to identify bodies.
- NOTE: Locations of labels can vary.
- Remove all fixtures from their boxes.
- Organize fixtures based on their labels at the install location.
- Always use proper safety equipment when installing fixtures.
- Tools shown are recommended for standard install. Tools needed may vary based on actual install location conditions.

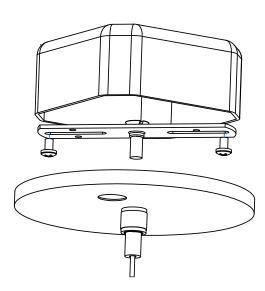

Kitted Hardware

- Saylite has provided the items listed here, with their Saylite part numbers listed. These items can be found in separate boxes shipped with the fixture.
- Ensure all parts are accounted for and set them aside until needed.
- Any additional hardware needed for this installation will be provided by others.

Step 3 - Install Hanging Kits

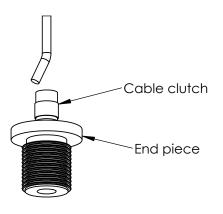

A. Install to Ceiling

- Install the hanging kits to the ceiling at the desired mounting locations.
- Ensure that hanging kits are properly secured.
- Refer to hanging kit installation guide for more information.

B. Prepare Cable Assembly

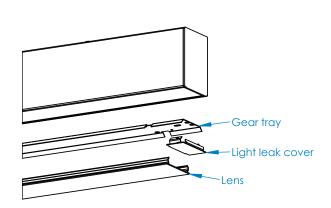

• Assemble the cable clutch assembly by threading the cable thru the cable clutch and end piece as shown.

Step 4 - Mount the Fixtures

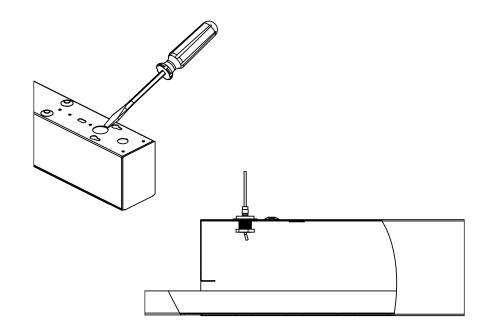

A. Remove Components

- Remove the lens from each fixture by using a flat head screwdriver to gently pry the lens off. Remove the light leak covers as well.
- Uninstall the LED gear tray by removing the screws securing it at each end.

B. Attach Cables

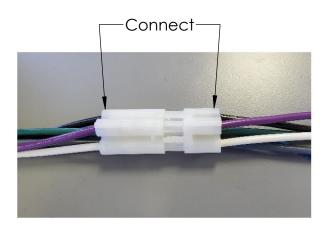

- Using a flathead screwdirver, gently pry off the 7/8" knockout to attach the cable end piece.
- Insert the end piece to the fixture and then use the 1/2" washer and nut provided to secure the fixture.
- One end of a fixture at each joint will need to be supported until the next step is completed.

Step 5 - Join Fixtures

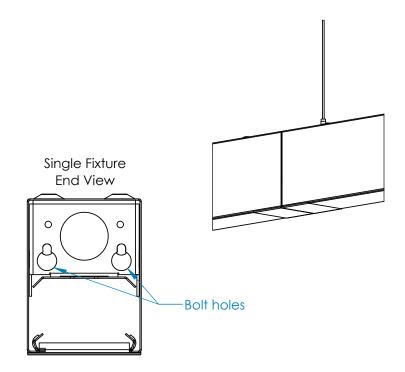

A. Connect Wiring

• Connect the wiring between fixtures. Press connectors together until a 'click' is heard.

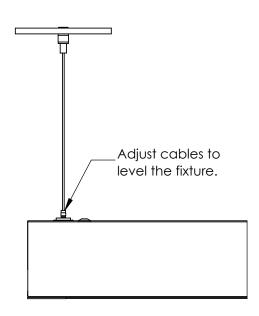

Use bolts and nuts not provided) to secure fixtures to one another.
 Ensure that nuts and bolts are installed after wiring has been connected.

Step 6 - Power and Level the Fixture

A. Level and Install Components

- Level the assembly as needed. Depress the cable clutch to adjust the cables.
- Reinstall the gear tray, lens, and light leak covers removed in step 4.

B. Connect Power

WIRING LEGEND			
BLACK	Circuit 1	Line Voltage	
WHITE	NEUTRAL	Line Voltage	
GREEN	GROUND		
GRAY	DIMMING	0-10V DC	
VIOLET	DIMMING	0-10V DC	
BLUE	Circuit 2	Line Voltage	
Wire Strain Relief Power Cable			
rower Caple——			

- Wire fixtures to the incoming power supply using the provided quick disconnect clip. For dimming option, refer to wiring legend above.
- Use UL approved connectors only. Follow all local, state and national codes.
- Insert the power cable into the wire strain relief, and push the wire strain relief into the canopy until it clicks into place.
- Fixture installation is now complete.
