PROJECT

TYPF

Medium Size: 150W/200W

Series PPF

LED Area Light (Medium & Large)

Large Size: 300W

Slick, modern Series PPF luminaires are designed to handle any environment. With a beautiful slimline design, along with one of the highest lumen performances on the market, this versatile fixture series can be used as flood lighting or area lighting with a multitude of mounting options. Energy savings of up to 60% are possible compared with HID or fluorescent. The PPF delivers 50,000 hours of lumen maintenance in a wide range of commercial and industrial lighting applications. PPF fixtures have also been engineered to withstand significant voltage surges common in large venues and operate in ambient temperatures up to 45°C. Three different lighting distribution patterns are offered: Type III and Type IV and Type VS.

CONSTRUCTION

One piece die-cast aluminum housing with UV resistant polycarbonate optical lens, outstanding corrosion protection.

TYPICAL OPTIONS & ACCESSORIES

Round pole, square pole, slipfitter or wall optoins. Multiple finish options (bronze, black, white and silver). A knockout on the bottom of the body allows adding a sensor easily and economically for enhanced energy savings and performance. Contact factory for additional details.

DIMENSIONS

See page 3 for details.

FEATURES & BENEFITS

- Lumen output 18000-42300lm with efficacy to 141lm/W
- Various distribution patterns including Type III, Type IV and Type VS
- Suitable for mounting heights ranging from 26-40' in area lighting applications
- Round pole, square pole, slipfitter or wall mount
- Optional photocell or motion sensor
- Voltage is 120-277V /347-480V and support 1-10V dimmable
- Fixtures are suitable for use in ambients from -40°C to 45°C (-40°F-113°F)
- Expected service life is over 100,000 hrs and 10 year limited warranty
- UL wet location listed
- 5 year warranty.

STRUCTURE

Note

- *Programmable LED drivers allow custom configured wattages and corresponding lumens.
- ** Consult factory for more sensor options.

We reserve the right to change design, materials, LEDs and finish in any way that will not alter installed appearance or reduce function and performance.

PHOTOMETRICS

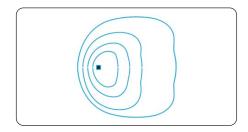

Offers a complete set of optical systems to meet every site lighting requirement. These systems provide remarkable flexibility in precisely matching light distribution patterns to specific site requirements.

Type III:

Type III optics produce an asymmetrical pattern that directs the majority of the light forward and equally on both sides of the luminaire. In a back-to-back configuration, it creates a rectangular pattern which can extend pole spacings.

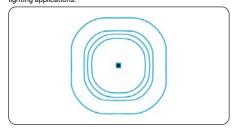

Type IV: Type IV is suitable for applications where light is primarily required forward with minimal backlight. Typical installations include perimeter poles.

Type VS:

Type VS optics produce a symmetrical square distribution pattern that distributes light equally on all sides of the luminaire. Type VS luminaires are universal for most area lighting applications.

MOUNTING

- · Standard versatile mounting arm accommodates multiple drilling patterns as well as square and round poles
- Wall Mount available for direct wall mounting and J-box mounting
- Optional for cast aluminum slipfitter mounting adapter (Compatible with more mounting adaptors such as Tenon, suited for various application)

Mounting Options

SARM - Square Arm Mount RARM - Round Arm Mount (4" and 5" Square and Round poles) Versatile mounting arm is simple to install and can be used with existing poles for retrofit installations.

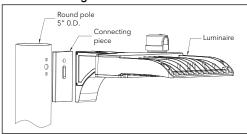

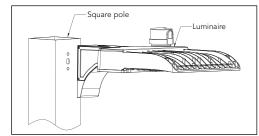

SW - Slipfitter Mount An optional cast aluminum mast arm adapter secures fixture head to nominal 2"(2-3/8"O.D. pipe size) horizontal steel tenon arm.

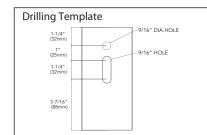

WARM - Wall Mount Wall Mount is easy to install for direct wall mounting with 1/2' conduit wiring or standard J-box mounting
